

BOILER HIRE

Hire boilers for continuous steam or hot water on-site

We have a solution for your specific situation with boilers in a variety of sizes, capacities, and pressures. Our rental boilers fire on Diesel. We can provide turnkey installation... start-up services, operator training, and support.

We are able to provide you with a boiler in a self-contained 20Ft High Cube container. These can be unattended if needed and are complete with water feed tank, stack blow-down tank. Safety and seismic compliant with NZ regulations. Hot water boilers are stand alone on these legs ready to connect into your system.

Our team ensures they will take as little time as possible to connect and get you up-and-running on your site.

Benefits of hiring a boiler from us
